EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Russell on January 20, 2010.

The application has been amended as follows:

In claim 1, line 4, before "microtiter", --a standard--has been inserted.

In line 14, before "pair", -the- has been deleted and--a--has been inserted.

On the last line of the claim, before "microtiter", -a- has been deleted and--said--has been inserted; and, after "array", --; and a tray having an opening for receiving and supporting the array, the tray having a standard microtiter footprint-- has been inserted.

The following is an examiner's statement of reasons for allowance:

Claims 1, 3, 5 and 7-10 are allowable over the prior art, since the prior art fails to teach or fairly suggest a reaction surface array diagnostic apparatus comprising a substrate with a plurality of reaction surfaces pre-deposited in micro-titer well spaced bound arrays; a plate having a plurality of wells extending through the plate in a standard micro-titer well spacing; a gasket fluidly sealing the plate to the substrate, the gasket having micro-titer well spaced wells combining with the wells in the plate to form reaction chambers about the reaction surfaces on the substrate; a pair of C-shaped

clamps engaging opposed edges of the plate and the substrate, the clamps compressing the gasket between the plate and the substrate; each clamp of the pair of clamps comprising two spaced legs extending in the same direction from opposite ends of a central wall; the apparatus further comprising an array of a plurality of side-by-side arranged stacks, each stack individually joined together by a pair of C-shaped clamps; the wells in each stack maintaining said micro-titer plate well spacing across the array ; the apparatus further comprising a tray having an opening for receiving and supporting the array, the tray having a standard micro-titer footprint.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance." Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalia Levkovich whose telephone number is 571-272-2462. The examiner can normally be reached on Mon-Fri, 2 p.m.-10 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
